Cocale to to the Well of a Well	

2		

designator F indicates vessel's second berth, where vessel shifted and moored 071930A May 55 and completed cargo operations 081000A May 55 after loading about 16-1700 metric tons benzel. Vessel departed second berth, designator F, 081540A May 55 with pilot aboard, returned through inner channels, as indicated by course line designator C, followed regular channels to Swinemunde, and dropped pilot at position indicated by designator D. Pilot departed vessel 081922 May 55. Source described weather conditions during dates of call as: "Good weather, with temperatures averaging 45-46° Fahrenheit and a low temperature of about 39° Fahrenheit."

25X1

Anchorage. confirmed presence and location of two weeks, designator B, but was unable to provide further information concerning outer port anchorage in addition to information contained in widely available current charts and publications.

25X1

Harbor. was unable to provide information concerning subject port harbor in addition to information contained in widely available current charts and publications.

- Controls. Boarding party, consisting of about 15 men, a small number of which were armed with pistols, came aboard 061915A May 55 on arrival at berth, designator E, and departed 2130A hours same date, after conducting a normal inspection and search. Crew members were mustered in quarters during search. Items secured included vessel's radio, binoculars, cameras, and flares; items present aboard but not secured included navigational radar, sextant, provisions, and various personal items such as digarettes and liquor. Boarding and search were described as "thorough." Surveillance while at berths consisted of one man wearing green uniform and cap and armed with machine gun, stationed at gangway for rotating four-hour watches and one man (or woman) wearing blue uniform and cap and armed with carbine, stationed on patrol about 50-60 yards distance from gangway on shore, also for rotating tour-hour watches. Vessel detected no other vessels or craft conducting surveillance while underway during approach and departure at subject port. Crew members did not possess seamen's books during call at subject port; for that reason no crew members were permitted to go ashore. Prior to departure 8 May 55 small boarding party came aboard 1500A hours and departed 1540A hours same date.
- 7. Harbor Craft Source described harbor craft as "medium-sized," coal-fired steam tugs, of which one was used as a pilot boat, two were used to assist vessel to back from first berth, designator E, to second berth, designator F, and two were used to assist vessel to get away from berth and through inner channel when departing. A number of other miscellaneous small craft were present about the harbor, but source had no opportunity to observe such craft.
- 8. Berths. Vessel loaded cargo at each of two berths while calling subject port--about 7-800 metric tons of renzol at berth indicated by designator E, and about 16-170) metric tons of benzol at berth indicated by designator F. Source could give only approximate description of berths and surrounding area. Source furnished a diagram indicating each of two berths, designators E and F, as well as a "renzol factory," tank farm, and location of another merchant vessel transferring an ore cargo to lighters. Subsequent paragraphs of this report will discuss the "benzol factory," tank farm, and ore cargo operations. Source was unable to recall details concerning berths but gave best recalledtion of characteristics of berths as follows: no off-shore wharf or loading platform was present at berths and vessel moored alongside channel bank by securing lines fore and aft to dolphine; about three six-inch pipelines were present at first berth, designator E, and only one six-inch pipeline was present at second berth, designator F; small fresh water lines, primarily for fire protection, were present at each of the two berths. Cargo operations began 071330A May 55 at first berth; vessel shifted to second berth about 1930A hours same date. Cargo operations were completed 081000A May 55 at second berth.

	Approved For Release 2003/10/23 : CIA-RDP80-00926A007800690001-2 C-0-H-F-I-D-E-H-T-I-A-L 25X1A	•
25X1	. , - 3 -	
	Construction. did not note the presence of any new construction in or about subject port narbor area.	
25X1 10.	did not note details of any naval installations in existence in subject port area except to note the presence of the permanent naval base at Swinemunde; source was unable to give description of naval base.	
25X1 11.	Shipbuilding and Ship Repair. did not observe any ships under construction or repair in subject port area. Source also did not recall the presence of any ways or facilities for shipbuilding or repair.	
12. 25X1	Petroleum. As shown on diagram, identified a "benzol factory" and tank farm; concerning tank farm source was somewhat uncertain of exact location and was unable to estimate numbers or sizes of storage tanks because of a high bank which obstructed vision. was also unable to estimate production or other pertinent information concerning "benzol factory," could not confirm presence of railroad tracks or stockpiles of coal in area and could not state the purpose or use of the "factory" building.	25>
25X1 13.	Grain. noted no grain-handling installations or cargo operations during dates of call at subject port.	
14.	Coal. noted no coaling installations or cargo operations during dates of call at subject port.	
15.	Maval Craft. Designator I indicates berthing area adjacent to naval base at Swinemunde where source noted a number of naval craft; exact locations and manner of berthing or mooring the not recalled. Maval craft were described as; about 12 PT resembling US "78° Higgins" Class; about four-five craft which source believed were PT but which were somewhat larger than PT described above and which source could not identify; about 7-10 naval tugs, described as "average tug." on naval craft observed, could not describe armament except for the general recollection that many of the naval craft probably mounted antiaircraft guns and that all were painted navy gray.	25X
1 16. 1	Merchant Shipping.	
17.	Shore Activities of Naval or Merchant Marine Personnel. was unable to provide information concerning shore activities of naval or merchant marine personnel, since crew members of source's vessel of call were not permitted to go ashore.	25X
₁ 18.	Miscellaneous. did not observe any indications of troop movements, saw no aircraft, and was unable to provide other information concerning industrial plants, military defenses, or personnel. On file in CIA Library are photostatic copy of HO Chart No 4925 with appropriate alphabetical designators and diagram of wharf area referred to in paragraphs 8 and 12 of the foregoing report, COMFIDENTIAL.
